## Outlines of Geologic History with Especial Reference to North America

Symposium Organized by  
**BAILEY WILLIS**

Compilation Edited by  
**ROLLIN D. SALISBURY**

**G**EOLOGISTS and all readers of geologic literature will welcome the publication, in book form, of an important series of essays and discussions on the subject of geologic correlation under the title, *Outlines of Geologic History with Especial Reference to North America*.

They embody the present state of knowledge and opinion concerning many of the fundamental problems of North American geology, and form an admirable supplement to earlier treatises and manuals.

The value of the book is greatly enhanced by the fifteen paleogeographic maps by Bailey Willis which accompany the papers.

## The Geography of the Ozark Highland of Missouri

By **CARL ORTWIN SAUER**, the University of Michigan

(Publications of the Geographic Society of Chicago)

The Ozark Highland of Missouri was selected for investigation because of its unusual wealth of geographic responses and because little is known concerning its conditions and possibilities.

The purpose of such a study is twofold: to furnish an adequate explanation of the conditions of life in a given area, and to contribute proved statements which will aid in working out fundamental principles.

The book is divided into three parts. The first is an outline of the environment. Only those things which are pertinent to an understanding of the conditions under which the people live are introduced.

The second part considers the influence of environment on the settlement and development of the different parts of the highland.

The third part is a study of the economic conditions as they exist today. In conclusion a forecast is offered of the lines along which the future of the region will be worked out.

A valuable feature of the volume is the 44 figures in the text and 26 plates.

**BUY A REMINGTON**

*It Lasts*

**T**HESE words *sum up* Remington Typewriter supremacy.

Yes, it is true that the Remington leads in special time and labor-saving features—the Self-Starter, the Key-Set Tabulator and the like.

It is true that the buyer who wants the very latest and best ideas in type-writing must go to the Remington.

It is true that the world's record for actual gross speed in typing was made on a Remington.

But underlying all of the distinctive Remington facts is the universal fact—the surpassing strength which causes every Remington to render reliable service and keep doing it through years of constant use.
